CERTIFIED PARTNERS:

Supporting Your Business Is Our Business

In an increasingly digital world, it can be hard to keep up. As an established, trusted managed IT service provider, we've got you covered. Behind the scenes, we install, update, and monitor the technology and systems necessary to keep your business secure and running smoothly.

BUSINESS INTELLIGENCE

We know maintaining the status quo isn't enough. Your business depends on a strong, secure network for files, emails, and basic internet access. Auditing your technology systems to determine issues and weak spots helps us to strategize ideal solutions that ensure you are fully protected. The right video conferencing equipment and software, like Teams or Zoom, connects you with colleagues and clients.

MAINTENANCE

Your downtime is kept to a minimum because we set up, secure, and update your entire network for you, including passwords, hardware, and support. Whether you're dealing with a broken screen, an outdated phone system, or a computer that just won't turn on, our technicians have years of experience resolving the most troubling issues. And when it's time for an upgrade, we provide data migration to new computers and software updates to existing systems.

MONITORING

We stick around for the long haul, supporting you on-site, by phone, or remote login. With the existence of viruses and malicious, data-deleting programs, it's easy to lose all of your data in an instant. Cybersecurity with our Managed Antivirus and network monitoring through our installed utility provide real-time threat detections and analytics. You'll receive analytics periodically.

INFRASTRUCTURE

Our own propriety software, FileNomad, is one of the few products that enables real-time sync across network folders, whether you use Windows, Mac, Linux, or even mobile devices. Managed cloud services such as Microsoft Office 365 allow you to securely work and seamlessly collaborate from anywhere on your computer, tablet, or phone. Access a massive pool of computing resources with Microsoft Azure, Google Cloud, or Amazon AWS.

Here's what our clients have to say:

Dakota Coffee Co. ★★★★★

Fantastic service!! Skylar came to the rescue on a Friday night and helped get the network at Dakota Coffee Co. back up and running so we could be ready to serve our customers Saturday morning! Thank you to Skylar and Digital Guru!!

Breckendale Flower Farm ★★★★★

It's always a pleasure to work with the staff at Digital Guru! They are very knowledgeable and have a great turn around time. I would recommend them to anyone!

Glende-Nilson Funeral ★★★★★

If you're looking for great service and innovative ideas, look no further. Dan and his staff have handled our IT needs for over a decade and provide better solutions than some of the larger tech companies I have worked with.

Let your business evolve. Call us today.
